About

Fresh Computer Science graduate working as an AI Engineer and Full-Stack Developer, focused on backend development with Python, Node.js, FastAPI, Flask, and REST APIs, plus applied NLP and RAG systems expertise. Shipped five+ real-world applications, strengthened through international hackathon participation and research credibility as a published IEEE author (Graph Neural Networks, iCOMET 2026). Currently building production MERN-stack applications at 10Pearls, seeking an AI/ML Engineer or Full-Stack Developer role to build scalable, intelligent systems for real business problems.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++

ML/DL: TensorFlow, PyTorch, Scikit-learn, Keras

AI/NLP: NLP, RAG, FAISS, Sentence Transformers, LLM APIs (OpenAI, Groq)

Data Analysis: Pandas, NumPy, Matplotlib

Backend: Flask, FastAPI, Node.js, REST APIs

Frontend: React.js, Next.js, HTML, CSS

Databases: PostgreSQL, SQLite, MongoDB

Tools: Git, GitHub, VS Code, Google Colab, Google OAuth

EDUCATION

Bachelor of Science in Computer Science

CGPA: 3.39 / 4.0

Sukkur IBA University, Pakistan

WORK EXPERIENCE

Software Developer Intern – MERN Stack | 10Pearls Pakistan (SHINE Internship Program) 2026 – Present | Remote

- Building full-stack web applications using MongoDB, Express.js, React.js, and Node.js, following professional agile development workflows, code review, and Git-based version control.
- Developing and consuming REST APIs to integrate frontend and backend services, applying industry-standard coding best practices and testing conventions.

Jan 2026 – Feb 2026 | Remote

AI/Machine Learning Intern | Elevvo Pathways

- Built and evaluated supervised machine learning models (Logistic Regression, Decision Tree, Random Forest) for classification tasks, benchmarking performance using Precision, Recall, and F1-score to select the best-performing model.
- Performed end-to-end data preprocessing and feature engineering on real-world datasets to improve model accuracy and reduce training time.

Feb 2026 – Mar 2026 | Remote

Python Trainer | iCodeguru

- Delivered structured Python programming tutorials on iCodeGuru covering core coding concepts for beginner-to-intermediate learners.
- Designed lesson plans and coding exercises that measurably improved student engagement and course completion.

KEY PROJECTS

Practice2Panel — AI Interview Preparation Platform (FYP) - React, Flask, PostgreSQL, OpenAI API, VAPI, Google OAuth

- Built an AI-powered interview preparation platform with Skill Prep, Mock Interview, AI Assistant, and Dashboard modules, combining voice and text evaluation with rubric-based automated scoring and feedback.
- Implemented VAPI-based real-time voice mock interviews and secure session-based authentication with Google OAuth.

[Github Repo](#) | [WebApp](#)

AI-Powered Hospital Appointment Agent — *FastAPI, React, PostgreSQL, VAPI, Twilio, Google Calendar API*

- Developed a full-stack voice-based appointment system automating booking, rescheduling, and cancellations, integrating live Google Calendar sync and automated SMS/WhatsApp reminders via Twilio.
- Built a secure admin dashboard for appointment and patient-record management.

[Github Repo](#)

[WebApp](#)

LostandFoundManagementSystem - *AI/NLP, Sentence Transformers, Google OAuth*

- Built an AI-powered lost-and-found platform using Sentence Transformers for semantic item matching and real-time smart search, with image upload support and automated email notifications.
- Implemented secure login/signup with Google OAuth and an admin dashboard for report and user management, with a responsive UI across mobile, tablet, and desktop.

[Github Repo](#)

Multilingual AI Health Assistant - *Groq API, NLP, Text-to-Speech*

- Built a Groq-powered medical assistant supporting 4 languages (English, Urdu, Roman Urdu, Sindhi) with automatic language detection, downloadable PDF health reports, and text-to-speech output.

PUBLICATION & RESEARCH

"Link Prediction in Bitcoin Transaction Graphs Using Graph Neural Networks" — Author & Presenter, 5th IEEE International Conference on Computing, Mathematics & Engineering Technologies (iCOMET 2026), Sukkur IBA University, Pakistan — May 22–23, 2026.

[View Publication](#)

CERTIFICATIONS

- Supervised Machine Learning: Regression and Classification — DeepLearning.AI
- Python Data Structures — University of Michigan
- Programming for Everybody (Getting Started with Python) — University of Michigan

ACHIEVEMENTS & ACTIVITIES

- Solved 10/10 puzzles as part of a team at Harvard's CS50 Puzzle Day 2026.
- Competed in international hackathons including lablab.ai Raise Your Hack (AI Travel Planner project), Generative AI Hackathon, NASA SpaceApps Challenge 2025, Meta Hacker Cup 2025, and MIT Programming Contest 2025.
- Completed the Aspire Leaders Program by Harvard Alumni for Education (2025), focused on leadership fundamentals and global collaboration.
